## ODKRIVAJ IN SPOŠTUJ DISCOVER AND RESPECT

**DR. PETER SKOBERNE**  
v. d. direktorja Triglavskega narodnega parka  
*Triglav National Park, Acting Director*

k takšnemu odkrivanju Triglavskega narodnega parka.

*The Triglav Lakes Valley has been known to local inhabitants from time immemorial, but the first to introduce the valley to the scientific community was natural scientist Balthasar Hacquet from Brittany. When admiring the Savica Waterfall in 1777, he also measured the temperature of its water. As it was relatively high, he assumed that the water feeding the waterfall must have flowed along the surface and heated up. Drawn by his pursuit of scientific discovery, Hacquet climbed the steep slope of the Komarča cliff until a rocky lake-strewn valley opened up in front of him after 6 hours of hiking. In time, this valley and its lakes have became a symbol of preserved nature of breath-taking beauty, and was included in the first proposals to establish a protected area. In 1924 a leasehold contract was signed, which introduced a protection regime in the area and made*

*the Triglav Lakes Valley the original core of the Triglav National Park.*

*The desire to discover and explore is deeply ingrained within each of us. Do not ignore it. Embrace it instead and let it lead you to the sources – the inexhaustible richness of nature, the mythical strength of Triglav, and the wisdom of local people which has retained its value even in the hectic pace of modern life. Discovery, however, is only the beginning of the story. What is important is how we will use our findings - to increase our awareness, or to quench our greed. The decision rests with each of us, but the sum of our decisions will have far-reaching consequences, and these may be much less favourable, even devastating. Exploration should foster and strengthen respect, as only respect can balance out human desire for excessive personal gain.*

*When you visit or explore a national park, behave like a respectful guest, humbled and in awe of Nature's wonders. In that way, each trip will leave you enriched and changed. And that is the way the Triglav National Park should to be discovered and explored. •*

Dolino Triglavskih jezer so že od nekdaj dobro poznavali domačini, znanstvenemu svetu pa jo je prvi približal bretonski naravoslovec Baltazar Hacquet. Ko je leta 1777 občudoval slap Savico, je tudi izmeril temperaturo vode. Ker je bila razmeroma visoka, je sklepal, da voda nad slalom teče po površju in se pri tem segreje. Raziskovalna žilica ga je gnala čez strmo steno Komarče, dokler ni po šestih urah hoje prišel v pusto, skalnato dolino z jezeri. Sčas-

soma je jezerska dolina postala pogem čudovite, ohranjene gorske narave, omenjena v prvih predlogih za zavarovanje. Dejansko so leta 1924 z zakupno pogodbo na tem območju vzpostavili režim varovanja, prvo jadro Triglavskega narodnega parka.

Želja po odkrivanju je globoko vsajena v vsakega od nas. Ne zatrimo je, ampak se ji pustimo voditi in zapeljati k virom – neizčrpnu bogastvu narave, simbolni trdnosti Triglava, modrosti domačinov, ki se še vedno zmore najti v vrvežu sodobnosti. Vendar je odkrivanje šele začetek zgodb. Pomembno je,

kako bomo spoznanja uporabili – za bogatenje svoje zavesti ali za potешtev pohlepa. Odločitev je v rokah vsakega posameznika, vsota odločitev pa ima daljnosežne posledice, dobre, manj dobre ali celo uničujoče. Bistveno je torej, da odkrivanje spodbudi in utrdi spoštovanje, ki zmore uravnovežiti morebitne želje po pretirani koristi.

Pri obiskovanju in raziskovanju narodnega parka ne moremo zgrešiti, če se obnašamo kot obzirni gostje, prevzeti od ponižnega čudenja. Tako se bomo z vsakega izleta gotovo vrnili bogatejši in drugačni! Vabljeni

# O Triglavskem narodnem parku

## About Triglav National Park

MOJCA VRHUNC  
Infocenter Triglavsko roža Bled  
Infocenter Triglavsko roža Bled

**T**riglavski narodni park (TNP) je edini narodni park v Sloveniji. Leži na območju Julijskih Alp v severozahodni Sloveniji in nosi ime po najvišji in najbolj znani slovenski gori, ki stoji sredi zavarovanega območja. Triglav velja za simbol slovenstva in pregovorno je pravi Slovenec le tisti, ki se je kdaj povzpel na njegov vrh. Poleg Triglava, ki se ga ob jasnom vremenu vidi iz skoraj vseh delov države, je na območju Triglavskega naravnega parka večina od več kot 400 slovenskih dvatisočakov.

TNP spada med najstarejše evropske parke. Že leta 1906 se je pojavila prva ideja o zavarovanju dela Doline Triglavskih jezer in uresničili so jo leta 1924 z ustanovitvijo Alpskega varstvenega parka, velikega 1400 ha. Leta 1961 so park nekoliko povečali in preimenovali v Triglavski narodni park. Leta 1981 pa je bil z Zakonom o TNP ustanovljen park v obsegu 83.807 ha, kar je približno 4 % površine Slovenije. Zakon iz leta 1981 je veljal vse do leta 2010, ko je bil sprejet novi Zakon o TNP. Z novim zakonom se je površina parka povečala

še za 174 ha. Na pobudo krajanov je bila območju TNP namreč priključena vas Kneške Ravne, ki leži na primorski strani Vogla, na skoraj 800 metrih nad morjem.

TNP upravlja Javni zavod TNP, ki skrbi za varovanje narave in kulturne krajine, opravlja pa tudi druge strokovne in raziskovalne naloge.

Za TNP, ki je sicer z zakonom razdeljen na tri varstvena območja, pogosto uporabljamo delitev na južno ali soško stran parka in severno ali gorenjsko stran parka. Meja med njima so ostri grebeni Julijskih Alp, v katere se z obeh strani zarezujejo številne alpske doline; Trenta, Koritnica, Bavšica na jugu ter Vrata, Krma in Radovna na severu so le nekatere izmed njih. Podnebje je na jugu zaradi bližine Jadranskega morja milejše kot na severu, kjer je čutiti vpliv hladnejše srednjeevropske gorske ter celinske klime. Relieve in klimatske značilnosti ene in druge strani pogojujejo tudi rastlinoščество parka ter višino gozdne meje, ki je na severni strani višja kot na južni. Naravne razmere so vplivale tudi na razvoj kulturne krajine, ki je na soški strani parka drugačna od gorenjske.

*Triglav National Park (TNP) is Slovenia's only national park. Located in the region of the Julian Alps, in north-west Slovenia, the park derives its name from Mount Triglav, which not only stands in the middle of the protected area but is also the highest and most famous mountain in Slovenia. Triglav is the symbol of the nation's identity and, according to a popular Slovene tradition, no one can be a 'true Slovene' unless they have climbed Triglav. Besides Triglav, which in clear weather is visible from practically all parts of the country, most of Slovenia's 400-plus mountain peaks rising above 2000 m are located within the Triglav National Park.*

*The Triglav National Park is one of Europe's earliest parks. The first motion to establish a protected area in the Triglav Lakes Valley was launched in 1906 and implemented in 1924 with the formation of the 1,400-hectare Alpine Conservation Park. In 1961 the park was extended and renamed as the Triglav National Park. The year 1981 saw the adoption of the Triglav National Park Act, promulgating a protected area which covers 83,807 ha, or approximately 4% of Slovenia's surface area. The 1981 Act remained in force until the new TNP Act was passed in 2010. According to the new Act, the park*

*was extended by 174 ha, to cover the village of Kneške Ravne on the Primorsko side of Vogel, at about 800 m a.s.l., following the initiative of the Kneške Ravne villagers.*

*Triglav National Park is managed by the Triglav National Park Public Institute, which is primarily committed to the protection of natural and cultural landscapes, but also performs other specialist and research tasks.*

*Although divided by law into three protective regimes, Triglav National Park is commonly divided into the southern side, or the Soča side of the park, and the northern, Gorenjska, side. The border between these two parts runs along the sharp ridges of the Julian Alps, into which numerous alpine valleys cut in on both sides, including the valleys of Trenta, Koritnica, and Bavšica in the south, and Vrata, Krma and Radovna in the north. Due to the proximity of the Mediterranean, the climate in the park's southern part is mild, whereas in the north it shows the effects of the colder Central-European alpine and continental climates. The relief and climatic conditions of both parts of the park determine the flora and the tree line, which runs higher on the northern side than in the south. Natural conditions also affect the development of the cultural landscape, showing clear differences between the distinct Gorenjska landscape and the typical cultural landscape of the Soča Valley side. •*

### NARAVO-VARSTVENI NADZORNIK SVETUJE THE PARK RANGER RECOMMENDS

MARJETA ALBININI  
Naravovarstveno nadzorna služba  
*TNP Ranger Service*

Poleg informacij na svetovnem spletu in naših informacijskih mestih vam lahko marsikaj zanimivega in uporabnega o parku povedo tudi naši naravovarstveni nadzorniki. Njihovo delo je izključno terensko, zato jih lahko srečate kjer koli med vrhovi in dolino. Stopite do njih, in z veseljem vam bodo svetovali!

V TNP je zaposlenih 20 nadzornikov, ki jih špoznate po sivo-črni uniformi, službenem avtomobilu, znaku in izkaznici. Vsak izmed njih deluje v svojem naravovarstvenem okolišu, velikem okoli 5000 ha. Tu med drugim opravljajo neposredni nadzor, skrbijo za parkovno infrastrukturo, opazujejo in spremljajo živali, sodelujejo pri strokovnih raziskovalnih in izobraževalnih načinah ter vodijo obiskovalce in jim svetujejo. Dve tretjini nadzornikov opravlja tudi naloge lovskih čuvajev.

Naravovarstveni nadzornik je pooblaščena uradna oseba, ki skrbi za izvrševanje Zakona o TNP ter nekaterih drugih aktov. Njegovo delo je usmerjeno v preprečevanje, vendar pa kršitelje za nekatere prekrške lahko tudi (denarno) kaznuje.

Although general information is readily available on the Internet and from the park's info points and centres, you can also learn a lot of useful and interesting information from TNP rangers. Since

most of the ranger's work is performed in the field, you can meet them at any stage of your trip. They are always ready and delighted to help.

Triglav National Park employs 20 professional rangers, who are easily identifiable by their grey-black uniforms, cars with TNP logos, badges and ranger identity cards. Each ranger covers a nature conservation area measuring approximately 5,000 ha. Rangers provide direct supervision and control, maintain the park infrastructure, observe and monitor wildlife, take part in specialist, research and educational tasks, and guide and advise visitors. Two thirds of park rangers also act as hunting guards.

A park ranger is an authorized official who is responsible for the enforcement of the TNP Act and several other legal acts. The work of a park ranger is prevention-oriented, although they can issue a fine for certain types of offences. •

### VARNO V GORE SAFETY FIRST

IZTOK BUTINAR  
Parkovni vodnik TNP  
*TNP guide*

Pri aktivnostih v TNP, bodisi hoji, plezanju, kolesarjenju, vodnih športih ali v zraku, je vaša varnost odvisna od vaše presoje, telesne pripravljenosti, opreme in pozornosti. Za svojo varnost ste odgovorni sami, zato aktivnosti v parku prilagodite svojim vsakokratnim sposobnostim, znanju in razmeram.

**Vreme:** Vreme v gorah je spremenljivo, zato je pred odhodom na turo nujno spremjanje vremenske napovedi. S seboj vzemite rezervna topla oblačila, oblačite se v plasteh.

**Zdravje:** Na turo se podajte primerno telesno in psihično pripravljeni ter z zadostno količino vode, saj je v vročih poletnih mesecih možnost dehidracije zelo velika.

**Poti:** Zaradi grušča na poteh je velika možnost zdrsa, predvsem na

izpostavljenih delih in v mokrem vremenu. Na zavarovanih plezalnih poteh uporablajte samovarovalne komplete, plezalne pasove in čelade ter primerno obutev.

**Oprema:** Uporabljajte le opremo, namenjeno za hojo v gore, ki naj bo pregledana, vzdrževana in pravilno hranjena, kadar je ne uporabljate. Obujte primerne planinske čevlje z primernim podplatom, ki segajo čez glezenj.

**Informacije:** Pred odhodom na turo pridobite čim več aktualnih informacij o stanju na poteh, odprtih kočah in bivakih ter vremenu.

V primeru nesreče kličite 112. •

*When you undertake an activity in the TNP, whether it is walking, climbing, cycling, a water sport or an air activity, your safety depends on your sound judgement, overall physical condition, equipment and concentration. Your safety is your own responsibility. Make sure you adapt your activities to your current level of fitness, knowledge, and general conditions.*

**Weather:** Weather in the mountains is very changeable. Before setting out on a mountain tour, always check the weather forecast. Bring a change of clothes, and dress in layers.

**Health:** When venturing on a tour, make sure it is suitable to your physical and mental fitness. Also, carry an adequate supply of liquid as the possibility of dehydration is high in the hot summer months.

**Paths:** Gravel increases the possibility of slipping, in particular in exposed places and in wet condi-

tions. Demanding secured routes require the use of self-belaying kits, harnesses and helmets, as well as suitable climbing footwear.

**Equipment:** Only use mountaineering equipment; the equipment should be checked, maintained and properly stored when not in use. Wear good quality high mountaineering boots with sturdy soles.

**Information:** Before setting off, obtain the relevant information on the conditions of paths and trails, available mountain huts and bivouacs, and the weather.

*In case of an accident call 112. •*

### HOP-ON HOP-OFF POKLJUKA-TRIGLAVSKI NARODNI PARK

### HOP-ON HOP-OFF POKLJUKA-TRIGLAV NATIONAL PARK

MAG. MARTIN ŠOLAR  
Informacijsko izobraževalna služba  
*Information and education service*

**Turistični avtobus poleti tudi z Bleda in Bohinja na Pokljuko**

V poletni sezoni 2014 bo poleg povezovanja Radovljice in Bleda s kraji v okolici, turistični avtobus ob sobotah in nedeljah trikrat dnevno vozil z Bleda in z Bohinjo na Pokljuko. Namenjen je turistom in tudi domačinom za dostop na Pokljuko pri čemer bo možno neomejeno prestopanje in s tem ogled različnih zanimivosti tega območja. Turistič-

ni avtobus je namenjen tudi pohodnikom, ki gredo v triglavsko pogorje za več dni in se vračajo v dolino po drugih poteh. Dodana vrednost turističnega avtobusa bodo vodení izleti z vodnikom Triglavskega naravnega parka po pokljuških gozdovih, barjih in planinah. Dnevna vozovnica za neomejeno uporabo turističnega avtobusa stane 5 EUR.

Več informacij o vozilih redih najdete v vseh informacijskih pisarnah na območju Bleda in Bohinja.

**Summer bus service from Bled and Bohinj to Pokljuka**

During the summer season of 2014, the hop-on hop-off bus will run from Bled and Bohinj to the Pokljuka plateau three times per day on Saturdays and Sundays, a welcome addition to the already established route connecting Radovljica and Bled with their neighbouring towns and villages. Tourists as well as local residents wishing to get to Pokljuka will be able to hop on and off at the various stops along the route and see the nearby sights. The bus is also ideal for hikers who set off on a several-day walk in the Triglav range and wish to return down a different path. A particularly attractive feature of the tourist bus is guided tours of the forests, peat bogs, and pastures of the Pokljuka plateau. The tours will be organized and led by Triglav National Park guides. The price of an all-day ticket is 5 euros.

More information on time tables is available at tourist information centres in Bled and Bohinj. •

## INFOCENTER TRIGLAVSKA ROŽA BLED

**MAG. MARTIN ŠOLAR**  
 Informacijsko izobraževalna služba  
*Information and education service*

Na Bledu v upravni zgradbi Triglavskega narodnega parka s poletjem 2014 odpiramo novo regijsko naravovarstveno in turistično središče Infocenter Triglavsko roža Bled. Gre za popolnoma prenovljeno, sodobno in večnamensko informacijsko središče, ki ga skupaj upravlja Triglavski narodni park in Turizem Bled. V Triglavski roži, ki bo odprta vsak dan, boste lahko pridobili vsakršno informacijo, tam pa bo na ogled tudi povsem nova razstava Gorenjske in Triglavskega narodnega parka z bogato multimedijsko predstavljivo. Poleg tega so v Infocentru mogoči vodení ogledi za skupine, v njem pa sta še trgovina s promocijskimi in tradicionalnimi izdelki domače obrti in okrepčevalnica.

Trajnostni razvoj turizma je za razvoj Gorenjske in Julijskih Alp izjemnega pomena. Poleg bogate naravne in kulturne dediščine nas združuje tudi bogastvo Triglavskega narodnega parka. Z novim Infocentrom Triglavsko roža Bled bomo goste seznanili z vrednotami in ponudbo destinacije ter jih povabili, da se jim prepustijo in jih polno doživijo.

*Infocenter Triglavsko roža Bled, the new regional nature conservation and information centre, located in the administration building of the Triglav National Park Authority and managed by the Triglav National Park and the Bled*

**Tourist Board, will open its door in the summer of 2014.** Open daily,

this fully renovated, modern, and multi-purpose visitor facility will provide visitors with relevant and useful information and invite them to see its brand new exhibition about the region of Gorenjska and the Triglav National Park, featuring a rich multimedia presentation. The centre will also organize guided tours for groups, and house a café and a gift shop selling promotional and traditional arts and crafts products.

Sustainable development of tourism is of key importance for the region of Gorenjska and for the Triglav National Park. We share the magnificent natural and cultural heritage of the region, and the treasures of the national park. The new Infocenter Triglavsko roža Bled will help us to better communicate the values and assets of the destination and invite visitors to discover, experience, and enjoy its riches. •

## TRIGLAV NATIONAL PARK

# O naravi in kulturni dediščini

## *About nature and cultural heritage*

### VISOKO-GORSKE PLANINE KOT SIMBOL KAKOVOSTI IZDELKOV, SOŽITJA Z NARAVO IN TRAJNO-STNEGA TURIZMA

### HIGH-ALTITUDE PASTURES AS A SYMBOL OF TOP-QUALITY PRODUCTS, HARMONY WITH NATURE, AND SUSTAINABLE TOURISM

DAVORIN KOREN

Služba za načrtovanje, upravljanje in razvoj  
Planning, Management and Development Department

**V**sodobnem turističnem gospodarstvu je zelo moderno poimenovanje t. i. sonaravnega turizma z različnimi imeni, kot so: na naravi temelječi turizem, zeleni turizem, odgovorni turizem, geoturizem, ekoturizem ter nekatere druge zvrsti nekakšnega alternativnega turizma.

Pravi turizem na planinah bo se-

veda lahko več kot to. Postati mora pomemben vir socialnih in ekonomskih dejavnikov ohranjanja naravne in kulturne dediščine v korist tako posameznikom kot tudi skupnosti. In ne nazadnje mora biti dodana vrednost nosilcem kmetijske dejavnosti na planinah.

Ko slišimo besedo planine, največkrat pomislimo na planinstvo, na sprehode po gorskih prostranstvih, na dopustniško doživljajanje gorskega sveta. Če govorimo o planinah in planšarijah, pa gre za območje resne gospodarske dejavnosti, ki je tesno povezna s kmetijstvom v dolini in od katere je odvisna marsikatera kmetijstva.

Ljudje so včasih silili v hribe iz nuje po iskanju novega življenjskega prostora, po urejanju novih pašnih površin za živilo. Zemlja v dolini je bila namreč v glavnem posejana z žitom.

Zgodbe nekdanjih »majeric« so še zdaj vklesane v zlizane kamne pastirskih poti. Do danes ohranjeni pašniki in žvenket kravjih zvoncev ne pustijo ravnodušne niti razdvojene in od vsakdanjega življenja utrujene človeške duše. Ali so ljudje včasih tod trpeli, se sprašujem, ko gledam majhne lesene stanove, ki so včasih, ob hudi uri, nudili zavetje živini in obenem tudi pastirju. Skupaj v dobrem in slabem! Da, ljudje so tod težko živelji, vendar so bili srečni. Vedeli so, kaj jih čaka in da za vsako nevihto pridejo tista kristalno čista, sončna jutra, zaradi katerih je vredno potpreti in prestat tudi temačne zimske večere v včasih prav takšne ljudi. Še živali gredo takrat lažje in hitreje na pašo, ki je ob močnih jutranjih rosah še posebej sočna. Prihajajo pa vroči popoldnevi, ko hladno senco nudijo mogočne krošnje starih dreves. Tudi tu so napisane zgodbe, zgodbe ljudi na robu preživetja, pa še vedno v popolnem medsebojnem sožitu in sožitu z naravo.

Planine Julijskih Alp predstavljajo pomembno območje ohranjene naravne in kulturne dediščine. Planinsko pašništvo, kot tradicionalni način gospodarjenja s kmetijskimi zemljišči v gorskem svetu, pomeni tudi bogato duhovno dediščino in ljudsko izročilo. Takšnega le redko vidimo v tako izvirni in še vedno uporabni obliki.

Planine v Triglavskem narodnem parku so večinoma lažje dostopne, primerne tudi za pohodnike brez večjih hribovskih izkušenj ter enodnevne družinske izlete. Glavna izhodišča za obisk fužinskih planin, ki so biser ohranjenje stavbne dediščine, je Zgornja Bohinjska dolina. Planine na Pokljuki se lahko lotite tudi z blejske strani. Še bolj dostopne so planine v Zgornjem Posočju, na katerih izdelajo več kot 70 ton odličnega planinskega sira na leto. Za bohinjske planine so bolj značilni poltrdi siri, kislo mleko in seveda kralj okusov, Mohant. Na marsikateri planini vam gostoljubni planšarji ponudijo tudi druge dobre, ki jih znajo v težkih pogojih planšarskega življenja še kako ceniti.

In the contemporary tourism economy, it is very popular to refer to sustainable tourism as 'nature-based tourism', 'green tourism', 'responsible tourism', 'geotourism', 'ecotourism' or any other alternative form. In fact, tourism on alpine pastures can be much more than that. It should evolve into an important source of social and economic factors associated with nature conservation and protection of cultural heritage, pursued for the benefit of

ing, which even made dark winter evenings and dark people worth while. On such mornings, even the animals graze more willingly and quickly, and the grass sprinkled with the morning dew is particularly moist. Then come hot afternoons when we all seek the cool shadows of mighty crowns of old trees. Nature writes many stories, the stories of people who are on the verge of survival but still manage to live in perfect harmony with each other and Nature.

The pastures of the Julian Alps are an important area of preserved natural and cultural heritage. Mountain pastures as a traditional form of farmland management practised in the mountains have also created rich spiritual heritage and folk traditions, which are rarely seen in such a pristine and still useful form.

individuals and the community. Also, and not least importantly, tourism should offer value added to the dairy farmers working on these pastures.

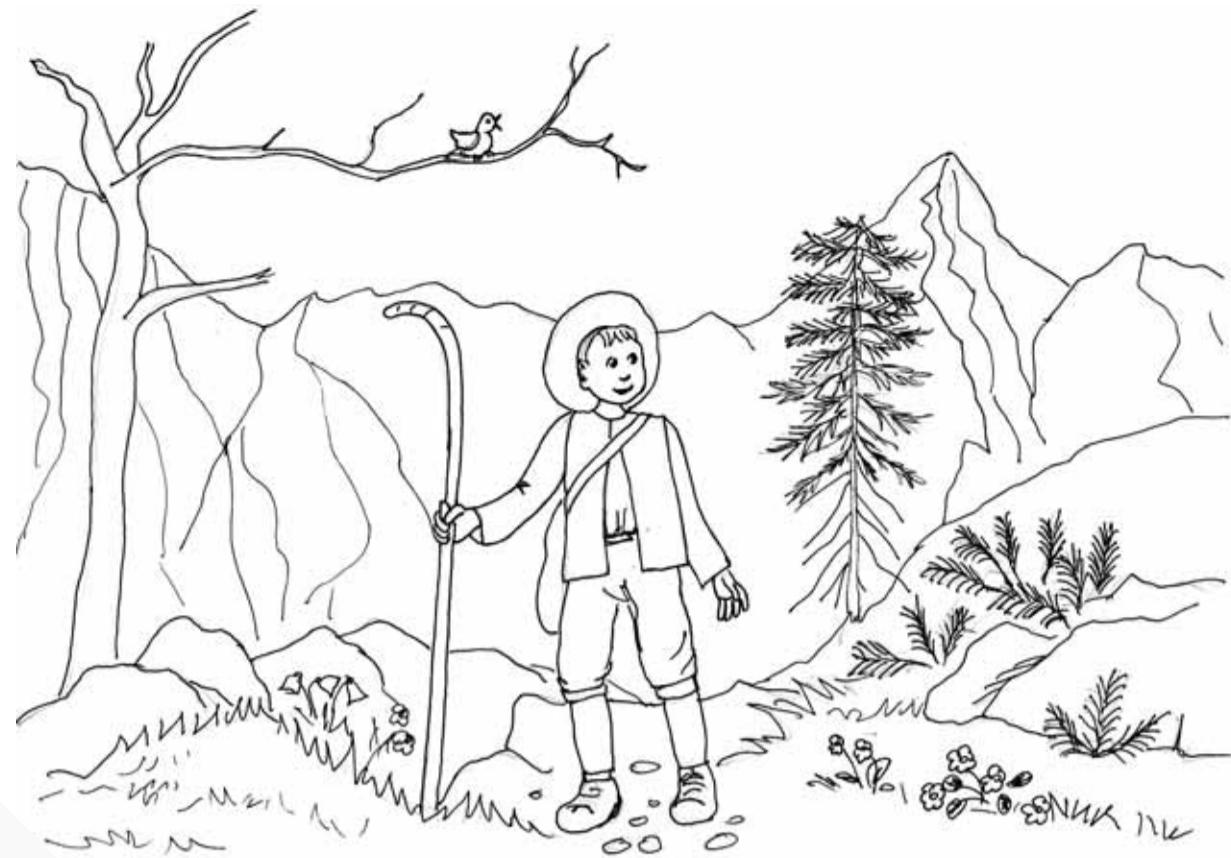

The word 'pasture' immediately brings to mind mountains, hiking in the alpine meadows, relaxing away from the crowds. However, dairy farming on mountain pastures is an economic activity which is tightly linked to agricultural practices in the valley and upon which many farms depend. In the past, people used to come to the mountains out of a need to find a space to live and to seek new pastures for their cattle. The land in the valley was mostly used for wheat farming.

The tales of former dairymaids lie carved in the weathered stones of the old shepherds' paths. Even today, the green, well-managed pastures and the ringing of cow bells stir something deep within a human soul, anxious and overwhelmed by the drag of everyday life. "Was life hard for people here?" I wonder as I observe the tiny wooden dwellings that used to provide shelter for shepherds and their cattle during storms. Man and animal, together, for better or worse! Yes, people used to live a hard but happy life. They knew what lay ahead, they knew that after the darkest storm, the sun will wake them up again into a crystal-clear morn-

Most pastures in the Triglav National Park are relatively easily accessible, suitable for trekkers without much previous experience and for one-day family trips. The main starting point for visit to the Fužinske planine alps, a wonderful example of preserved architectural heritage, is the Upper Bohinj Valley. The pastures on the Pokljuka plateau can also be accessed from the direction of Bled. Even more easily accessible are the pastures in the Upper Soča Valley (Zgornje Posočje) where over 70 tons of delicious cheese is manufactured every year. The Bohinj alps are characterized by semi-hard cheese varieties, sour milk, and the indisputable king of taste, the Mohant soft cheese. On many alps friendly dairymen will also provide you with other goodies which are particularly valuable in the harsh conditions of high-altitude dairy farming. •

Poznaš fanta na sliki, ki se je v Vandotovih pravljicah sprehajal po gorah Triglavskega naravnega parka? **POBARVAJ SLIKU!**

CODE OF CONDUCT

- Spoštujmo navade in način življenja domačinov.
- Bodimo tihni, da ne bomo vzne-mirjali živali.
- Ne puščajmo ničesar, odpadke odnesimo s seboj.
- Ničesar ne odnašajmo, razen fotografij in doživetij.
- Cvetje je najlepše, kjer raste, zato naj tam tudi ostane.
- Kurimo samo na za to določenih mestih.
- Pse vodimo na vrvice.
- Steze so namenjene pohodnikom, vožnja s kolesi po njih ni dovoljena.
- Pri hoji po poteh sledimo ozna-kam na stebričkih in markaci-jam.
- Vozila puščajmo na za to ozna-čenih mestih.
- Noč prezivimo v organiziranih naštanitvah, taborjenje zunaj temu namenjenih območij ni dovoljeno.
- Respect the customs and traditions of the people who live in the park.
- Do not make any noise so as not to disturb the wildlife.
- Leave nothing but footprints.
- Take nothing but photographs and memories.
- Dogs should be kept on a lead.
- Trails are intended for hikers, and cycling along the trails is not permitted.
- Follow the signs on information posts along the trails.
- Leave vehicles in designated places.
- Spend the night in accommoda-tion facilities because camping is not allowed outside the design-nated areas.

# Svet ob vznožju Julijcev mi pomeni vir pisanja, vir življenja

*The world at the foot of the Julian Alps - a source of inspiration, a source of life*

MARJAN ZUPAN

Marjan Zupan je domačin iz Podhomia, vasi na robu Triglavskega narodnega parka in v neposredni bližini soteske Vintgar. Ljubezen do domačega kraja in čudovite okolice mu že od nekdaj služi kot navdih pri pisani mnogoterih tiskanih in spletnih objav o preteklih in poprteklih dogodkih s tega konca Gorenjske. Je član Muzejskega društva Bled, pisec Razgledov Muzejskega društva Bled in reden pisec člankov v lokalnih časopisih.

*Marjan Zupan is a native of Podhom, a small village near the Vintgar Gorge, on the edge of the Triglav National Park. The love of his home town and its beautiful surroundings has always inspired him to write or feature in print and web articles about the (semi-)historical events that occurred in this part of the Gorenjska region. Marjan Zupan is a member of the Museum Society of Bled, and contributes articles to the newsletter Views of Musuem Society of Bled as well as other local newspapers.*

**“**Ne potrebuje domišljije in slepečega olepševanja oni, ki opisuje divne kraje po naši Gorenjski. Zapiše naj samo to, kar vidi naveden opazovalec, pa bo gotovo zadost.« Te preproste in resnične besede je leta 1899 zapisal Ivan Godec. Sam pa k temu rad dodam, da lepote, posejane po zgornji Gorenjski, še nas, domačinov razvajeno oko vedno znova odkriva in občuduje.

Kaj kmalu po najstniskih letih sem začel zavestno opazovati krajino okoli sebe, gorenjsko vas Podhom, v kateri živim, brskati za krajevno zgodovino, življenjem in sobivanjem domačinov z okoljem, v katerem delajo in živijo. Obiskal sem katerega izmed arhivov, si izpisoval iz kronik in preostalih zapiskov, zbiral dokumentarno fotografijo in kaj posnel tudi sam. Pustil sem ljudem pripovedovati, jih znal poslušati in si marsikaj tudi zapisati. Nastala je domoznanska knjiga o vasi Podhom, narodopisna Rpečnekova vučca, Divja romantika soteske Vintgar, o Blejskem gradu, življenju ljudi v času praznovanja in času hude preizkušnje ... Nemalokrat je bil navdih ali nabojo doživetega v Triglavskem pogorju,

na visokih planotah Pokljuke in Mežaklje, alpskih dolin in bližnje soteske Vintgar tako močan, da je bilo videno, zabeleženo in občuteno treba »zapakirati« v reportažo in prek časopisa nesebično deliti. Sobivanje domačina, vpetega v Triglavsko pogorje, je bilo navdih za knjižico Zapisan naravi. Navdiha mi je narava ponujala in mi ga še ponuja na slehernem koraku in že gredo misli svojo pot. Ravnodušnega me ne puščajo pokljuške planine, misteriozna Lipanca in Klek, z močnim zgodovinskим nabojem, visoki oltar Gorenjske, vrh Bratove peči, in čudovita dolina Radovne, z vsem, kar se je tamkaj nekoč vrtelo, žagalo, mlelo, furalo ... pa vse tja do Krme in naprej proti očaku Triglavu, ki iz svojega vznožja spušča po dolinah vse te bistre vode, vir življenja, kakorkoli jih obrnemo.

Vsa ta obdajajoča narava me je vseskozi učila. Človek se tega nevsiljivega učenja z leti vse bolj zaveda, ga čuti. Naučiš se sprejemati darove narave, ji biti hvaležen in ji kaj tudi vračati. V procesu sobivanja nas prav ta narava ves čas preizkuša, če je treba, namoči, utruji ... nesebično pa nas uči dajati in ljubiti.

*»An author who writes about the beautiful parts of Gorenjska does not need imagination to embellish the truth. He shall only write as much as an ordinary observer sees, and it will be enough.« These simple and true words were written by Slovenian author Ivan Godec in 1899. But, as I like to add, even we, the inhabitants of Zgornja Gorenjska, our eyes spoilt by the region's beauty, are sometimes amazed and in awe of the wonders of the nature that surrounds us.*

*In my late teens I first started to pay attention to the surrounding landscape and Podhom, the typical Gorenjska village where I live, and to study the local history, the life of the local people, and their coexistence with the natural environment in which they live and work. I visited several archives, copied information from chronicles and other documents, collected documentary photographs, and even made some by myself. I let people talk, listened to their stories, making notes. Soon I had enough material to publish a local studies book about Podhom and the ethnographical book titled Rpečnekova vučca. Also, I wrote about the wildly romantic gorge of Vintgar, about Bled Castle, and the life of people at a time of celebration and a time of struggle ... On many*

*occasions my inspiration born from what I saw or experienced in the Triglav range, the high-altitude plateaus of Pokljuka and Mežakla, in the alpine valleys or in the Vintgar Gorge, was so strong that I needed to pack into a story what I saw, felt, or noted down, and share it with the world. A man whose ties with the Triglav range were inseparable was my inspiration for the booklet Zapisan naravi (Committed to Nature). Nature has provided me with inspiration on every step. I am not immune to the beauty of Pokljuka pastures, the mysterious Lipanca and Klek alps, their historical role, the the summit of Bratova peč, the high altar of Gorenjska, and the wonderful Radovna valley, with everything that was once turned, sown, milled, or carted there, up to the Krma valley and forward, towards the mighty Triglav who unleashes the wealth of crystal clear waters springing to the surface – the ultimate source of life.*

*Nature has always been my best teacher. With years, I have to come to comprehend its lessons better. I am learning to embrace the gifts of nature, be thankful for them, and give nature something back in return. In the process of coexistence nature tests and hardens us, while selflessly teaching us to give and love. •*

## RAZSTAVE

Nova stalna razstava

**RAJ POD TRIGLAVOM**

**KJE:** Infocenter Triglavska roža

Bled, Bled

**KDAJ:** vsak dan od 8.00 do 18.00

Nova stalna razstava

**BIOTSKA RAZNOVRSTNOST**

**TRIGLAVSKEGA NARODNEGA**

**PARKA**

**KJE:** Info središče Dom Trenta,

Trenta

**KDAJ:** vsak dan od 10.00 do 18.00

Stalna razstava Slovenskega

planinskega muzeja

**VZPON NA GORO**

**KJE:** Slovenski planinski muzej,

Mojostrana

**KDAJ:** vsak dan od 9. do 19. ure

Fotografska razstava na prostem

**JULIJSKE ALPE 360°**

**KJE:** Hostel pod Voglom, Bohinj

**KDAJ:** od 23. 5. do 31. 8.

PRIPOROČAMO OGLED!

## EXHIBITION

New permanent exhibition

**PARADISE AT THE FOOT OF**

**TRIGLAV**

**WHERE:** Infocenter Triglavska roža

Bled, Bled

**WHEN:** every day from 8.00 to 18.00

New permanent exhibition

**BIODIVERSITY OF TRIGLAV**
